

Quick Start Guide: Unity License Operator

Step 1: Download & Install

- **Download:** Get the latest **unitynode** app from the Google Play Store.
<https://play.google.com/store/apps/details?id=io.unitynodes.unityapp>
 - **Permissions:** When prompted, allow the app to **trust unknown sources** and **run in the background** to ensure continuous operation.
-

Step 2: Initialize Your Role

- Open the app and click the **Get Started** button.
- Select the **License Operator** tab from the roles menu.

Step 3: Enter License & Sign In

- **License Code:** Enter the code received from your Unity Node Operator. **Copy and paste** directly from your email to avoid errors.
- **Sign In:** Enter your email address and click **Continue**.
- **Verification:** Enter the **One Time Code (OTP)** sent to your email and click **Verify**.
- **For multiple phones use the "Plus 1" Email technic.**
- **Setup Instructions: Managing Multiple Licenses with the "Plus One" Technique**
 - To ensure each phone you operate is tied to a unique license while keeping your notifications centralized, please follow these instructions for setting up multiple devices.
 - **The "Plus One" Strategy**
 - When signing into the Unity app on different phones, do not use the exact same email address for every device. Instead, use the **email+number** technique to create unique identifiers:
 - **Phone 1:** yourname@gmail.com
 - **Phone 2:** yourname+1@gmail.com

- **Phone 3:** yourname+2@gmail.com
- **Why use this method?**
 - **Centralized Access:** You will still receive all One-Time Passwords (OTP) and verification codes in your **main email inbox**.
 - **Independent Tracking:** Each license will be tied to each phone separately, preventing conflicts.
 - **Easy Management:** This allows you to log back into specific devices if necessary.
- **Action Steps for Operators**
 - **Record Everything:** Keep a log of each phone type, the specific license number assigned to it, and the associated "plus one" email used.
 - **Enter Email:** When prompted to "Sign in with your email," enter the modified email address (e.g., +1, +2).
 - **Verify:** Check your main inbox for the OTP and enter it to complete the sign-in on that specific device.

Step 4: Bind Your License

- Go to the **License Tab** (key icon) at the bottom.
- Select the specific license you wish to use to **bind it to your phone**.

Step 5: Monitor Connectivity

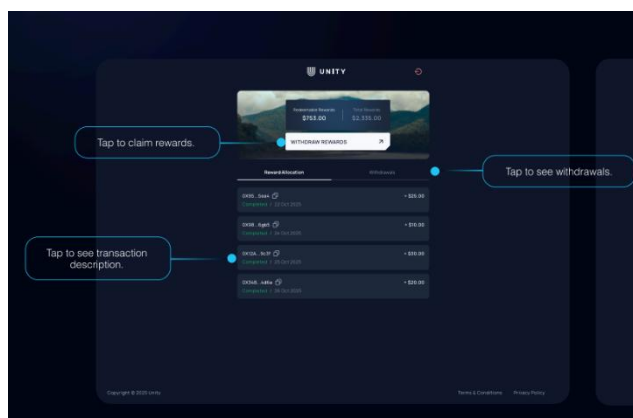

Check your **Proof of Work** section to ensure all three indicators are green:

- **Service Status:** Active
- **Switch Node:** Connected
- **Validation Node:** Connected
- **Check Tasks:** Always Connected
- **Monitor Uptime** - **+90% uptime is good, +80% uptime is poor.**

Step 6: Claiming Rewards

- **Web Portal:** Visit manage.unitynodes.io on a desktop and login with your main email.
- **Withdraw:** Click **Withdraw Rewards** (1 UPS = \$1 USD).
- **Details:** Enter your **amount** (\$5.00 min / \$150.00 max), your **crypto wallet address**, and the correct **blockchain**.
- **USD withdrawals are pending for future Unity App updates.**

Best Practices for Success

- **Uptime:** Maintain **90%+ uptime** for maximum earnings.
- **Network:** Avoid using VPNs, Vlan, or firewall software.
- **Limit:** Keep fewer than **20 phones** per single IP address/router.
- **Trouble Shooting:**
 - Force Stop App, Clear Cache, Clear Data, Restart App
 - Ensure no phone settings allow the app to go to sleep.
